

## Activity Sheet 15

### Applying the: “Framework for addressing spatial considerations in national poverty reduction strategies”

#### Purpose

The purpose of this activity is to deepen participants’ knowledge of the key issues related to spatial factors of poverty and the role of these in national poverty reduction strategies (PRSPs). This activity is an opportunity for participants to practice applying the framework, and assessing the extent to which their own national PRSPs take into account the spatial considerations of poverty.

#### Group Activity

1. Refer to the summary of the “Framework for addressing spatial considerations in national PRSPs” on page 2, and the handout that provides a full description of the framework, discuss: -

*To what extent are the “spatial concerns” for one or more of the 5 areas, addressed in your national PRSP?*

2. Prepare your findings on flip chart.
3. Elect a person to present your findings to the plenary.

**Elements of the “Framework for addressing spatial considerations in national PRSPs”**

Full details of this framework are in the handout.

Each of the five areas (A to E) is explored in terms of *spatial concerns*, *quantitative & qualitative parameters*, and *steps*.

**For this activity, focus on the *spatial concerns* only.**

<i><b>Spatial concerns</b></i>	<i><b>Quantitative &amp; qualitative parameters</b></i>	<i><b>Steps</b></i>
<b>Five areas: -</b>		
A. Who are the poor and where do they live?		
B. Objectives and key targets		
C. Enabling policies necessary to stimulate growth and remove impediments to participation by the poor		
D. Participatory process		
E. Monitoring & evaluation
