

Activity Sheet 24

Road Safety: Group 1

Organisational Requirements

Purpose

This exercise explores some of the causes of road crashes and considers a variety of measures to address the issues associated with accidents so as to improve road safety.

Group Activity

1. Discuss the following questions:

A. What part do organisational and institutional issues play in the cause of road crashes?

B. In what ways may the organisations & institutions responsible for road safety be strengthened so as to improve road safety?

2. Note your points on a flipchart. You may include diagrams and pictures to illustrate your points.

3. Prepare to present your findings to the plenary.

Activity Sheet 24

Road Safety: Group 2

The role of Engineering & Planning

Purpose

This exercise explores some of the causes of road crashes and considers a variety of measures to address the issues associated with accidents so as to improve road safety.

Group Activity

1. Discuss the following questions:

A. What part do engineering issues play in the cause of road crashes?

B. What role does engineering have to play in preventing/ reducing crashes and fatalities?

2. Note your points on a flipchart. You may include diagrams and pictures to illustrate your points.

3. Prepare to present your findings to the plenary.

Activity Sheet 24

Road Safety: Group 3

The role of Education & Training

Purpose

This exercise explores some of the causes of road crashes and considers a variety of measures to address the issues associated with accidents so as to improve road safety.

Group Activity

1. Discuss the following questions:

A. What part does road user behaviour play in causing crashes?

B. How may education and training be used to increase road safety and prevent/reduce crashes and fatalities?

2. Note your points on a flipchart. You may include diagrams and pictures to illustrate your points.

3. Prepare to present your findings to the plenary.
