

Activity Sheet 26

Case Study from Nepal An Affordable Safety Barrier

Purpose

The purpose of this activity is to provide participants with the opportunity to reflect on the experiences from Nepal and to consider the extent to which any lessons may be applied to the countries in which they are working.

Group Activity

1. Read the case study sheet given to you by your facilitator and discuss the following questions:
 - A. *What are the requirements for safety barriers in countries you are working in? How appropriate is the gabion safety barrier?*
 - B. *How may the experiences of using the gabion safety barrier in Nepal be applied to the countries you are working in? What lessons can be learnt?*
2. Make a note of your points on a piece of paper (you are not required to give a presentation).
3. Prepare to contribute the key points raised in your group discussions to the plenary.
