

Activity Sheet 73

Integrating social + economic analysis for road investments in Vietnam

Case Study # 2

Purpose

The purpose of this activity is to deepen participants' knowledge of developing an analytical framework that integrates economic and social factors when assessing road investments. Participants explore how the approach and lessons from the Vietnam experience might be applicable in their own country contexts.

Group Activity

1. Refer to the copy of the power point handouts, and discuss the following:

To what extent could the approach used in Vietnam to capture non-monetary benefits when assessing road investments, be applied in your contexts?

2. Prepare your notes on flip chart.
3. Elect a person to present your findings to the plenary.
