

## PPPI, Gender and Poverty Reading List and References

Please note, this is a reference list of some of the more useful documents that fed into the background paper. As there are no written materials that address Gender in PPPI, the referenced documents on PPP relate chiefly to pro-poor dimensions. The main reading source for Gender and Poverty in PPPI is therefore the background paper. In relation to broader issues of gender and infrastructure, the Annex document 'Introduction to Gender and Infrastructure' prepared for this training will be useful. Some references are also provided to augment reading on this.
