

Activity Sheet 17

Monitoring and PRP

Purpose

The purpose of this activity is to explore the issues that should be considered when carrying out monitoring, the types of data that should be collected, and how it should be used by planners. The importance of considering gender issues is also examined.

Group Work

1. Discuss the following questions in your group:
 - A. *What should be monitored when planning rural access interventions?*
 - B. *What should be monitored when implementing access interventions?*
 - C. *How can we ensure that monitoring data is gender sensitive?*
 - D. *How can the monitoring data best be used by Planners?*
2. Write your points on paper and be prepared to contribute to the plenary discussion.
