

Brief on the preparation of the 5th Global Status Report on Road Safety 2023 and the role of the national data coordinator (NDC)

Dr. Kacem laych (WHO) <u>iaychk@who.int</u> 22 March 2022

Road safety data collection in WHO 5th Global status report on road safety Concept Note

Road traffic injuries are a leading cause of death, killing nearly 1.3 million people annually. Approximately 90% of these deaths occur in low- and middle-income countries. Unless action is taken urgently, the number of road traffic injuries and deaths is likely to continue to rise in most regions of the world as motorization increases. Indeed, if current trends continue unabated, road traffic injuries are predicted to rise from their current position as the ninth leading cause of death to become the fifth leading cause of death by 2030.

In 2009 WHO published the first *Global status report on road safety* for which it gathered information from Member States using a standardized method. This report provided the first assessment of the road safety situation at the global level and revealed the gaps that exist in national road safety efforts. In March 2010 the United Nations General Assembly adopted resolution 64/255¹ which proclaimed 2011–2020 as the Decade of Action for Road Safety. Another resolution in 2022 74/299²proclaimed 2021-2030 as a Second Decade for Action. These resolutions call on WHO to monitor and evaluate the impact of actions to date. Target 3.6 in the 2030 Agenda for Sustainable Development for road safety –calls to halve the number of road traffic deaths and non-fatal injuries globally. The *Global Status Reports* are a mechanism used to monitor progress to this end.

WHO is currently working on the 5^h Global status report. The objectives of the report are:

- To monitor progress relating to the Decade of Action for Road Safety and SDG 3.6 at the national and international levels
- To describe the road safety situation in all Member States and assess changes that have occurred since the publication of previous versions of the *Global status report*.
- To evaluate the gaps in road safety nationally to stimulate action
- To generate data to stimulate research on road safety implementation decision making, and to strengthen the network of individuals caring for and working on road safety around the World

As with previous *Global status reports*^{3 4 5 6}, national level data will be collected through the request of CRVS data and administration of a questionnaire involving multi-sectoral consensus among national stakeholders. In addition, supplementary data will be collected through alternative national sources. Unlike previous reports, the process benefits of the collaboration of the regional Road Safety Observatories. In addition, the process to generate the report will operate under a web-based platform securing safe access to all those involved; training and meetings will take place online; and regional reports and other products will be crafted into the project management since inception.

Concept note on GSRRS 2023

WHO HQ writes to regional directors and advisors (Feb 28, 2022)

Hiring of RDFPs, official communication with countries to formally designate NDFP –a process led by WHO regions

Regional advisers (RAs) think about regional-specific questions to add to questionnaire (deadline April 29, 2022) RAs receive NDFP nominations and enter it into GSRRS 2023 platform. Deadline May 27, 2022

NDFP receives and enters the contributors into platform. Deadline June 30, 2022

RDFP Regional Data Focal Point

- NDFP National Data Focal Point
- RA Regional adviser

Overall chronogram 2022 (DRAFT)

Important deadlines

At will –inform RSO members of process & share objective to have RSO NDCs be WHO contributors if not NDFP

April 2022 –send suggested RSO specific questions to regional adviser

May 2022 – designation of NDFPs; update of questionnaire

June 2022 – online training for data providers

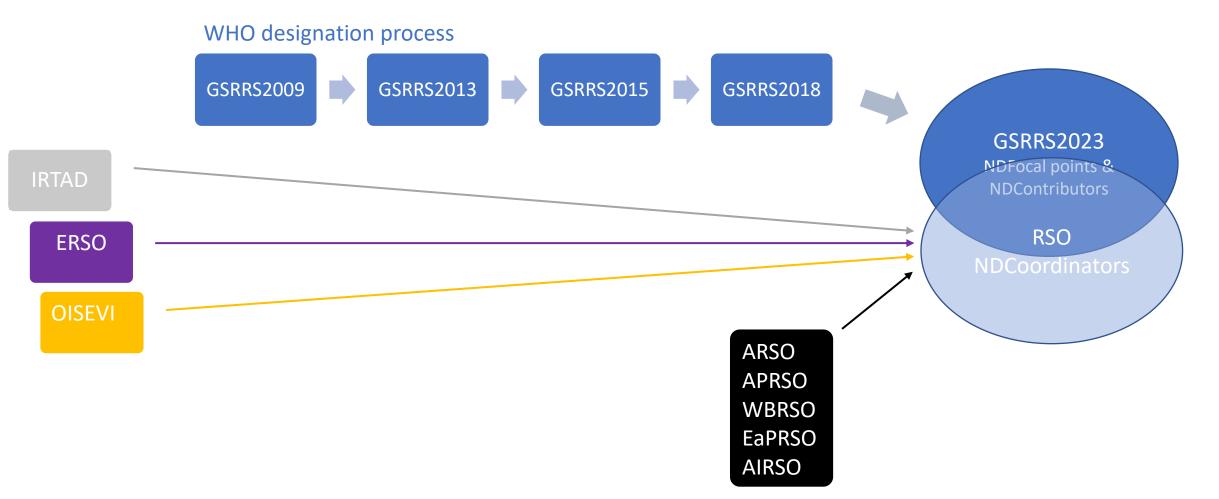

July 1- 2021 data entry begins*

3Q 2023, release GSRRS2023 and WHO regional report (and RSO reports, if done)

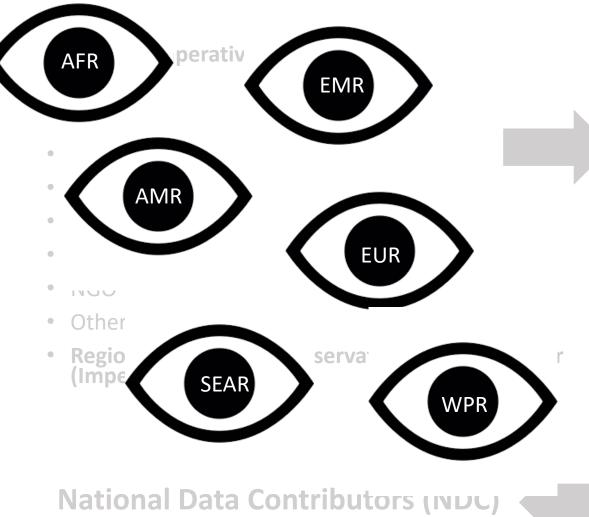

*Legislation data should refer updates up to Dec 2022

Our objective: Increase efficiency

At the Regional and HQ level

From RAs and RDFPs computers

In turn, he/she secures access to all NDCs under his/her watch (deadline June 30, 2022)

NationFrom Analyst and Administrator HQ computers

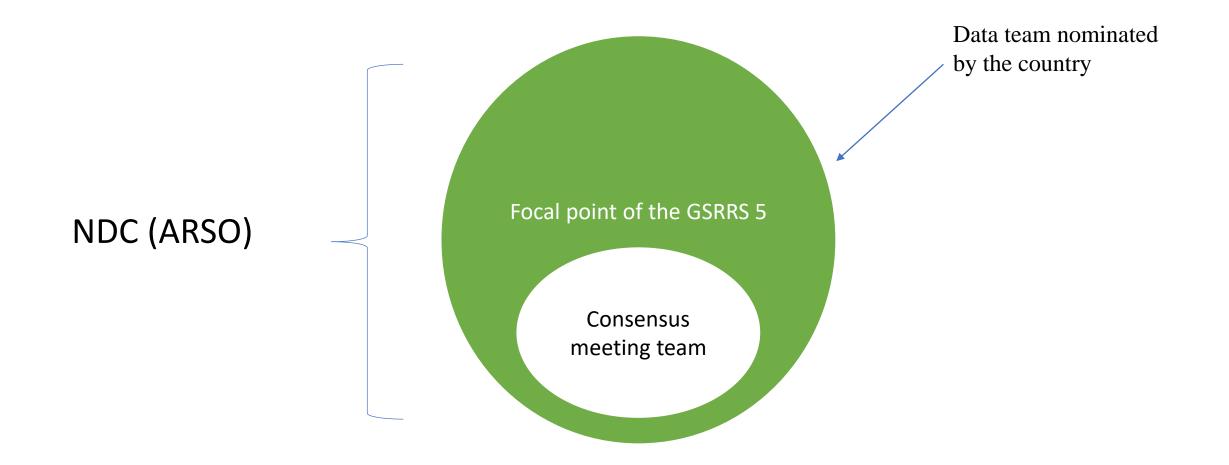

HQ

One selected (designated)

Regional Advisor/data coordinator grants him/her access to GSRRS2023 data entry portal (deadline May 28, 2022)

The role of NDC (ARSO)

Consensus meeting (respondents / contributor)

- Ministry of Health
- Ministry of Transport / Infrastructure
- > Ministry responsible for law enforcement/police (Ministry of Inter.)
- National Highway Agency
- Emergency Care Directorate
- > CRVS
- Ministry of Education
- National Statistics Office
- > Nongovernmental organizations working on road safety
- > Academic institutions working on road traffic injury research

Collaboration between

WHO (Departments of Social Determinants of Health (SDH) HQ / Regions and Road Safety Observatories

Monitoring SDGs:

engagement of other sectors for mutual benefits

- SDG target 3.6:
- By 2020, halve the number of global deaths and injuries from road traffic accidents (extended to 2030)
- Marrakech Declaration at the 1st African Road Safety Forum, Nov 2018: encourage countries to prioritize the development of their CRVS system for better data on deaths from road traffic crash.
- Side two-day sessions during the Forum with participation from several countries to review their systems including CRVS to improve their data

Multi-country workshops on support to countries to improve their CRVS system

- Tunisia 3-5 April 2019
 - A total of 28 participants from 10 low and -middle-income countries namely, Botswana, Cameroon, Ghana, Kenya, Morocco, Nigeria, Senegal, Tanzania, Uganda and Tunisia.

• Ethiopia - December 2019

A total of 27 participants from 10 low – and -middleincome countries namely, **Benin, Burkin a Faso, Ethiopia, Mali, Mozambique, Namibia, Togo, Zambia a nd Zimbabwe.**

Country delegations consisted of a mix of people from ministries of health, statistical offices, civil registries, police and institutions for road safety.
